PHILIPS  
RESPIRONICS

Built for the demands of today's  
**active patients**

The SimplyGo Mini portable oxygen concentrator (POC) is designed to help you grow your business by giving you the ability to offer light weight, attractive features, and true reliability that today's patients demand in a POC.

At Philips Respironics, we have earned our reputation for designing and building excellence into all of our products. Now, with SimplyGo Mini, you can offer your patients the choice for excellence in lightweight portable oxygen concentrators.

## Reliability matters to your business

When you place a POC with a patient, you need to know that it's going to have the reliability and ruggedness to help your business:

- Eliminate recurring oxygen delivery costs and cylinder hassles
- Reduce maintenance costs
- Ease inventory management
- Minimize patient calls

SimplyGo Mini has undergone the same rigorous testing regimen as that of our SimplyGo POC. SimplyGo Mini was subjected to real-world conditions including impacts, vibrations, and temperatures to deliver reliable performance day in and day out.

### Meet more patients' needs with nearly 20% more oxygen

With the ability to deliver nearly 20% more oxygen output than the nearest competitive POC, SimplyGo Mini has the highest oxygen output of any POC weighing 5 lbs. or less.<sup>1</sup> This means that you can offer more patients the features and performance they are demanding in a POC.

<sup>1</sup>When devices are operated at their maximum setting.

## COPD management program

Philips Respironics end-to-end solutions may help to reduce hospital readmissions and the subsequent healthcare dollars spent on COPD management. Across the continuum of care, our products are designed to provide comfortable and effective treatment and allow patients to easily transition from hospital to home.

## Why purchasing a quality product matters

Potential increase in patient retention

Potential increase in clinician confidence and referrals

Increase in employee value-added activities because of fewer failure calls

Decrease in inventory because of fewer swap-outs

Decrease in resources and overtime payments to deal with failed equipment calls and pick-ups

Decrease in day-to-day business disruptions because of product failures

### Simply smart design

As the smallest and lightest POC ever developed by Philips Respironics, SimplyGo Mini is built for today's patients with features like:

- Attractive and sleek design
- Easy-to-remove external battery
- Light weight (5.0 lbs.)
- Intuitive, easy-to-read screen
- Strong, comfortable carrying case
